## living the city

*Having a beautiful and functional city,  
nicely neat areas,  
increase life's expectations,  
it means making people happy and  
smiling in the everyday life.*

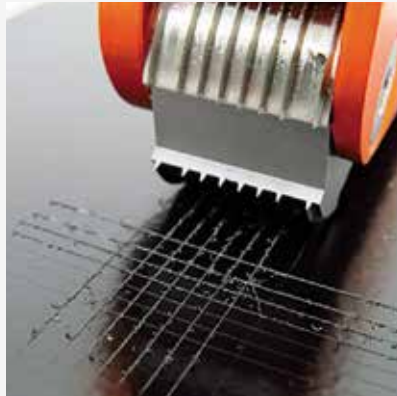

quality

ISO 9001 2000

Fonderie Viterbesi check every single manufacturing process from project to the casting, workmachine, packaging and final delivery to the customers. It is fully committed to research, and development and investment in new modern processes to ensure the best customer service possible.

## product testing

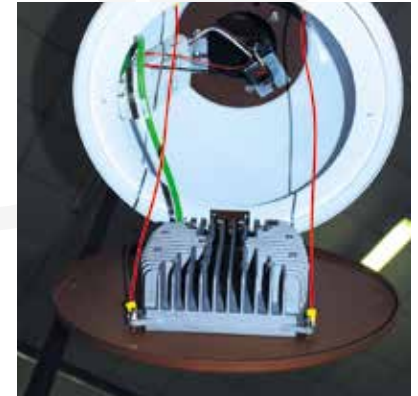

*"cross-cut" adhesion test  
EN ISO 2409*

*"paint and coating" test*

*quality surface control*

*wiring and test*

## reliability

# materials

*Application of primary materials is at the base of our production. High quality materials guarantee the resistance to usury, durability and safety use.*

**Cast iron:** is the material which we know perfectly and thorough which we achieved the position of the leader in the field.

**Aluminium:** remarkable material due to its strength and durability.

**Steel:** commonly used in manufacturing of all our range of products both hot deep galvanised or powder-coated steel available in all colours from our colour chart.

**Stainless steel:** material of an undisputed charm for a host of commercial applications where high resistance for harsh environments and specific ambient condition is required.

**Iroko wood:** material with a hardness that ensures high impact resistance and abrasion.

## colours

**Interpon.**  
powder coatings  
**EVERY COLOR IS GREEN**

*Fonderie Viterbesi Group has chosen **AkzoNobel** as official partner to ensure quality paint on his products. A new generation powder coating paint plant produce a paint surface with a guaranteed thickness of 200 microns and his life tested to 2000 hours in salt spray chambers.*

**Ultra  
Durability**

*varnishing*

*laser cutting*

*finishing*

*machining*

*sandblasting*

*workmanship*

*casting*

from design

*The Technical Department of FV Group is at the designer's side, starting from the simple idea to the full achievement of the project, finding the right accord between design and technology.*
